- **Soft Skills:** Problem-solving, Analytical Thinking, Collaboration

Experience

Junior Web Developer Trainee

Technowait Software Training Center, Jalgaon | Dec 2025 – Present

- Developed and maintained **responsive web applications** using **React, JavaScript, and CSS**.
- Collaborated with designers and back-end developers to improve **UI/UX performance**.
- Ensured **cross-browser compatibility** and responsiveness across multiple devices.
- Gaining hands-on experience in front-end/back-end development and debugging.

Web Development Intern

Oasis Infobyte | Remote | Feb 2023 – Mar 2023

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Worked on front-end design and UI enhancements for web applications.
- Collaborated on small projects to implement dynamic functionalities.

Projects

Employees Leave Management System

<https://github.com/Aakashjadhav794/Employees-Leave-Management-System>

- **Employees Leave Management System** built with the MERN stack for managing employees and leave requests.
- **Admin Panel:** Add employees, manage leave, assign projects, and view reports.
- **Employee Panel:** View profile, assigned projects, apply for leave, and track leave history.
- Developed using **React.js**, **Node.js**, **Express.js**, and **MongoDB** for a seamless experience.

Personal Portfolio

<https://github.com/Aakashjadhav794/Portfolio>

- A visually appealing and responsive portfolio built using HTML and CSS.
- showcasing my expertise in web development and passion for creating user-friendly interfaces and modern designs.

Temperature Converter

<https://github.com/Aakashjadhav794/Temperature-Converter> | [Live Preview](#)

- A simple web-based Temperature Converter that lets users convert between Celsius and Fahrenheit instantly.
- Built using HTML, CSS, and JavaScript with a clean and responsive user interface.
- Ideal for quick conversions and understanding basic frontend development concepts.

Spotify Clone

<https://github.com/Aakashjadhav794/Spotify-clone>

- Spotify clone built with HTML and CSS is a visually styled web interface replicating Spotify's layout and design.
- including features like a navigation bar, playlists, and a music player, focusing solely on front-end aesthetics.
